EXPERIENCE

11/2022 - 12/2022

Full-stack developer

Wikimedia Finland - Internship

- I used my knowledge and skills to work as a full-stack developer. During this stage I worked with my team member to create and develop a new full-stack app, additionally we coded new features for an existing project.
- We used Agile/Scrum method preparing the Sprints and Sprint reviews, used GitHub as a Kanban board, Git version control, created documentation and practiced code review.

2/2001 - 12/2011

Data entry

Intexim SRL - Romania

- I've worked on many large scale projects, both nationally and with other EU countries. The projects aimed digitization of textual resources and documents of all kinds into their digital equivalent. Tasks involved OCR documents indexation, verification and correction.

Project coordinator

Intexim SRL - Romania

- As project coordinator I conducted day-to-day projects coordination and implementation, with a particular focus on high quality work and meeting the deadlines.
